CUMULATIVE INDEX
VOLS 6 - 10
1971 - 1975

U. I. C. C.
DEC 20 1977
LIBRARY

AUTHOR INDEX

Numbers in bold type refer to the Volume, and the other numbers to the page within that volume

A

- Abbot, J. S. *See* Johnson, K. E. ... **9** 171
 Afifi, Safa E. *See* Azim, A. A. Abdul ... **8** 76
 Agabio, G. *See* Bruno, R. ... **7** 122
 Ahmed, N. *See* Mahmud, I. ... **10** 111
 Atekar, V. A. *See* Mukherji, A. N. ... **10** 155
 Andersson, I. *See* Troselius, L. ... **10** 174
 Andersson, Th. *See* Troselius, L. ... **10** 174
 Andrew, R. H. C., & Ashworth, V.
 Corrosion of mild steel in the
 presence of high molecular weight
 water soluble polyacrylic polymers **9** 238
 Annamalai, P. *See* Rajagopalan, K. S. **6** 175
 Appleby, A. J., & Mayne, J. E. O.
 Effect of cations on the autoxidation
 of the linseed oil fatty acids and
 the inhibitive properties of the
 degradation products ... **10** 201
 Arup, H. *See* Poulson, B. ... **9** 91
 Ashton, S. A., King, R. A., & Miller,
 J. D. A. Protective film formation
 on ferrous metals in semicontinuous
 cultures of nitrate-reducing
 bacteria ... **8** 132
 — Miller, J. D. A., & King, R. A.
 Corrosion of ferrous metals in
 batch cultures of nitrate-reducing
 bacteria ... **8** 185
 Ashworth, V. *See* Andrew, R. H. C. ... **9** 238
 Atterbury, P. *See* Schön, L. ... **8** 38
 Austen, I. M. *See* West, J. M. ... **7** 189
 Azim, A. A. Abdul, Gouda, Venice K.,
 Shalaby, Laila A., & Afifi, Safa E.
 Corrosion behaviour of lead in salt
 solutions. I. Uncoupled lead electro-
 trodes ... **8** 76
 — *See also* Gouda, Venice K. **8** 81; **9** 185
 Azzerri, N., & Baudo, G. Comparative
 corrosion resistance of tin free steels
 chromium-type to synthetic and
 natural food media ... **10** 28

B

- Balk, A. H. Th., Boon, J. W., & Etienne,
 C. F. Stress corrosion cracking in
 austenitic steel fittings for façade
 panels ... **9** 4
 Banas, A. *See* Juchniewicz, R. ... **6** 234
 Bancroft, G. M., Mayne, J. E. O., &
 Ridgway, P. Mössbauer spectra and
 the structure of oxide films present
 on iron after exposure to dry air
 and to chromate solutions at pH 4 **6** 119
 Banerjee, T. *See* Panda, P. K. ... **9** 51
 Barbangelo, Armada. *See* Bonora,
 P. L. ... **10** 23
 Bardal, E., Molde, P., & Eggen, T. G.
 Arc and flame sprayed aluminium
 and zinc coatings on mild steel:
 Bond strength, surface roughness,
 structure and hardness ... **8** 15
 Barton, K., & Stanners, J. F. Atmos-
 pheric corrosion sites in Europe
 available for tests on steel protec-
 tion ... **8** 156
 Baudo, G. *See* Azzerri, N. ... **10** 28
 Baccaria, Anna Maria. *See* Mor, E. D.
 ... **8** 25; **9** 53; **10** 33
 Bahrens, C. Research and development
 programme on 'Corrosion and cor-
 rosion protection' in the German
 Federal Republic ... **10** 122

Corros. J.

- Bentley, M. N. *See* Rowlands, J. C. ... **7** 42
 Bernhardtsson, S.-O. *See* Troselius, L. ... **10** 174
 Bettex, W., Cowling, R. D., & Fritsche,
 M. An electronic current integrator **6** 224
 Beynon, J. G. *See* Butler, G. ... **7** 168
 Bhakta, U. C., & Lahiri, A. K. Stress
 corrosion cracking of α -brass in
 ammonium sulphate solution ... **8** 182
 Bishop, R. R. Corrosion protection of
 steel highway bridges. I. Full scale
 trials of paint systems ... **9** 149
 Blum, R. *See* Maahn, E. ... **9** 39
 Board, P. W., Holland, R. V., & Steele,
 R. J. Prediction of pitting corrosion
 in tinplate from capacitance meas-
 urements ... **7** 87
 Boden, P. J. *See* Taylor, M. F. ... **6** 61
 Bombara, G. *See* Bruno, R. ... **7** 122
 — *See also* Giuliani, L. ... **8** 20
 Bonds, J. D. *See* Burns, D. ... **6** 45
 Bonora, P. L., Ponzano, G. P., &
 Lorenzelli, V. Contribution to the
 study of localised corrosion of
 aluminium and its alloys. I. Critical
 potential ... **9** 108
 — II. Influence of the environment ... **9** 112
 — Barbangelo, Armada & Pon-
 zano, G. P. Contribution to the
 study of localised corrosion of
 aluminium and its alloys. III. In-
 fluence of organic protective coat-
 ings ... **10** 23
 Booker, C. J. L. *See* Jarman, R. A. **8** 33; **10** 150
 — *See also* Whitaker, R. A. ... **8** 246
 Boon, J. W. *See* Balk, A. H. Th. ... **9** 4
 Bose, S. K., & Sircar, S. C. Kinetic
 study of thin film growth on silver
 in bromine vapour at low temper-
 atures (35°–70°C) ... **8** 177
 — Kinetics and mechanism of thin
 chloride film growth on silver and
 silver-cadmium alloys at low tem-
 peratures (35°–70°C) ... **8** 279
 Bowers, J. E. *See* Carter, V. E. ... **9** 16
 Bray, H. J. *See* Fairman, L. ... **6** 170
 Breen, A. J. Primary petroleum distil-
 lation plant—Selection of materials **9** 197
 Britton, S. C. Changing priorities in
 corrosion work ... **9** 130
 — Examination of the layer pro-
 duced by chromate 'passivation' of
 tinplate ... **10** 85
 — & Sherlock, J. C. Examination
 of oxides on tin surfaces by cathodic
 reduction ... **9** 96
 — *See also* Sherlock, J. C. **7** 180 222 227;
8 210
 Broli, Aa., Holtan, H., & Midjo, M.
 Use of potentiokinetic and potenti-
 static methods for the determination
 of characteristic potentials for
 pitting corrosion of an Fe-Cr alloy **8** 173
 Bromley, A. F. *See* Neufeld, P. ... **7** 285
 Brown, A. R. G., & Coomber, Donia E.
 Behaviour of couples of aluminium
 and plastics reinforced with carbon
 fibre in aqueous salt solutions ... **7** 232
 Bruno, R., Agabio, G., & Bombara, G.
 Effect of weathering on the electro-
 chemical behaviour of steels ... **7** 122
 — & Calderone, F. Anodic behav-
 iour of 17-7 precipitation harden-
 ing stainless steel in acid media ... **7** 174

- Burns, D., Bonds, J. D., & Simms, D. W.
 Typical cases of corrosion in central
 heating systems in council properties
 — summary ... **6** 45
 Bushrod, C. J., & Hampson, N. A.
 Anodic behaviour of lead in per-
 chloric acid. I. Continuous and
 interrupted polarisation ... **6** 87
 — Stress in anodically formed lead
 dioxide ... **6** 129

SUBJECT INDEX

Numbers in bold type refer to the Volume, and the other numbers to the page within that volume

A

- Acetate; Inhibition of the corrosion of iron by benzoate and — ions. Mayne & Page ... 9 223
- Acid; Anodic behaviour of 17-7 precipitation hardening stainless steel in — media. Bruno & Calderone ... 7 174
- Acid and food media; Effect of tin ion complexing substances on the relative potentials of tin, steel and tin-iron alloys in pure —. Willey... 7 29
- Acid corrosion; Electrochemical and weight loss measurements of inhibition of the — of steel. Driver & Meakins ... 9 227
- ; Inhibition of the — of steel by n-alkyltrimethyl- and n-alkyltriethyl-ammonium compounds. Meakins ... 6 111
- ; Tafel slopes and chemical structure of inhibitors of the — of steel. Driver & Meakins ... 9 233
- Acid, Monochloroacetic; Inhibition by some thiocompounds of the corrosion of copper in — solution. Patel & Franco ... 10 205
- Acid, Nitric; Cathodic protection of 70/30 brass in 2.0M — in the presence of organic corrosion inhibitors. Desai *et al.* ... 10 39
- ; Corrosion of construction materials, Ti 125, Ti 260, 304 L and Uranus 65, in contact with Pt catalysts in — production. Kostić *et al.* ... 9 211
- Acid, Phosphoric; Electrochemical behaviour of nickel-containing alloys in — solutions. Hart & Evans 10 181
- Acid solutions; Effect of atmospheric oxygen on the electrode potential and corrosion inhibition of steel in —. Meakins ... 6 109
- Acids; Promotion by nitrates of the dissolution of tin by — and its inhibition. Sherlock & Britton ... 8 210
- Acids, Fatty; Anodic behaviour of iron in sodium sulphate solutions containing —. Mrowczynski & Szklarska-Smialowska ... 10 192
- ; Effect of cations on the auto-oxidation of the linseed oil — and the inhibitive properties of the degradation products. Appleby & Mayne ... 10 201
- Acids, Fruit; Complex formation and corrosion rate for tin in —. Sherlock & Britton ... 7 180
- Acrylonitrile; Inhibitory action of — on the corrosion of zinc in sea water. Mor & Beccaria ... 8 25
- Airframes; Corrosion and corrosion prevention in —. Scott ... 6 145
- Alkyltrimethyl (triethyl) ammonium compounds; Inhibition of the acid corrosion of steel by —. Meakins ... 6 111
- Alloy additions; Influence of some binary — on the atmospheric corrosion of high-purity iron. Taylor *et al.* ... 6 61
- Alloy (IN-586); Resistance of a nickel-base, 25% Cr, 10% Mo — to corrosion in aqueous environments. Hart ... 7 105
- Aluminium; Behaviour of couples of — and plastics reinforced with carbon fibre in aqueous salt solutions. Brown & Coomber ... 7 232
- ; Corrosion and anodic polarisation behaviour of — in sodium hydroxide solution containing sucrose or allied products, with and without calcium. Subramanyan & Krishnan ... 7 184
- ; Kinetic study of the uptake of sulphur dioxide by —. Spedding ... 7 281
- ; Recent developments in pitting corrosion of —. Johnson 6 200
- Aluminium alloy; Performance in atmospheric exposure of an — anodised by the sulphuric acid process for architectural use. Carter 9 10
- Aluminium alloys; Comparison of the fracture toughness and stress corrosion behaviour of four —. Carter *et al.* ... 9 16
- ; Ethylenediamine as a corrosion inhibitor for — in hydrochloric acid. Desai *et al.* ... 6 269
- ; Inhibition of the corrosion of — in sodium hydroxide solution. Mukherji *et al.* ... 10 155
- ; Protection of — against stress corrosion cracking in saline water by properly oriented anodic coatings. I. Influence of anodising conditions. Skoulidakis & Karageorgos ... 10 17
- Aluminium and its alloys; Contribution to the study of localised corrosion of —. I. Critical potential, E_R , with respect to pitting. Bonora *et al.* 9 108
- II. Influence of the environment. Bonora *et al.* ... 9 112
- III. Influence of organic protective coatings. Bonora *et al.* ... 10 23
- Aluminium and zinc coatings; Arc and flame sprayed — on mild steel: Bond strength, surface roughness, structure and hardness. Bardal *et al.* ... 8 15
- Aluminium-copper alloy; Dihydroxybenzenes as corrosion inhibitors for — in sodium hydroxide. Talati & Modi ... 10 103
- Aluminium-manganese alloy; Amines as corrosion inhibitors for — in phosphoric acid. Talati & Patel... 9 181
- Al-Mg and Al-Cu alloys; Use of micro-electrodes in the study of stress corrosion in aged —. Doig & Edington ... 9 88
- Al-5% Zn-1% Mg; Mechanism of exfoliation (layer corrosion) of —. Mattsson *et al.* ... 6 73
- Al-Zn-Mg alloy; Influence of trace additions of silver on the stress corrosion of an —. Doig & Edington ... 9 22
- ; Stress corrosion susceptibility of as-quenched —. Doig & Edington ... 9 220
- Ammoniacal copper sulphate; Effect of stress and impressed current on tarnish film growth on α -brass in — solutions. Sircar ... 7 2
- Ammonium sulphate solution; Stress corrosion cracking of α -brass in —. Bhakta & Lahiri ... 8 1
- Amines; — as corrosion inhibitors for aluminium-manganese alloy in phosphoric acid. Talati & Patel ... 9 1
- Amine solutions; Stress corrosion cracking of α -brass in aliphatic —. Sircar *et al.* ... 9
- Ammeter, Zero-resistance; Inexpensive — for galvanic studies. Wolstenholme ... 9 1
- Anodic behaviour; — of lead in perchloric acid. I. Continuous and interrupted polarisation. Bushrod & Hampson ... 6
- ; — of 17-7 precipitation hardening stainless steel in acid media. Bruno & Calderone ... 7 1
- Anodic passivation; — of iron and steel in solutions containing non-oxidising inorganic inhibitors and breakdown of passivity by chloride ions. Rajagopalan & Venu ... 6 2
- ; — of mild steel in hot concentrated sodium hydroxide solutions. Neufeld & Bromley ... 7 2
- Anodic polarisation; Corrosion and — behaviour of aluminium in sodium hydroxide solution containing sucrose or allied products, with and without calcium. Subramanyan & Krishnan ... 7 1
- Antimony-lead alloys; Mechanism by which silver additions inhibit anodic corrosion of 4-5% —. Mao & Rao ... 6 1
- Atmospheres containing organic acid vapours; Corrosion of metals and their protection in —. Donovan & Stringer ... 6 1
- Atmospheric corrosion; — of metals at Mandapam Camp, India. Rajagopalan *et al.* ... 6 1
- ; — sites in Europe available for tests on steel protection. Bartoň & Stanners ... 8 1
- ; Influence of some binary alloy additions on the — of high-purity iron. Taylor *et al.* ... 6
- ; Macroscopic structure of the rust layer formed in the — of steel. Honzák ... 8 1
- ; Prediction of the severity of — by discriminant analysis of local meteorological factors. Tripathi *et al.* ... 7 2
- Atmospheric exposure; Performance in — of an aluminium alloy anodised by the sulphuric acid process for architectural use. Carter 9
- Auger spectroscopy; Detection of lead by — on iron inhibited in lead azelate solution. Mayne *et al.* ... 8 2
- Azelate; Detection of lead by Auger spectroscopy on iron inhibited in lead — solution. Mayne *et al.* 8 2

—; Mechanism of inhibition of corrosion of mild steel in aqueous solutions of sodium —. I. Effect of solutions of sodium — on the air-formed oxide film on mild steel. Mayne & Page ... 7 111
 II. Uptake and distribution of — ions on the surface of inhibited mild steel. Mayne & Page 7 115

B

terial corrosion; — of iron encapsulated in polyethylene film. Dittmer *et al.* ... 10 47
 tic Sea water; Corrosion tests in — on heat exchanger tubes of various metallic materials. Henrikson & Knutsson ... 10 128
 tles; Perforation of lead tanks by —. Mahmed & Ahmed ... 10 111
 zoate; Inhibition of the corrosion of iron by — and azelate ions. Mayne & Page ... 9 223
 ler, Benson; Accentuation of pressure loss and magnetite formation in a —. Schoch *et al.* ... 6 257
 ax; Microbiological corrosion of tanks in long-term storage of gas oil. II. Further bacterial studies and use of — as a biocide. Roberts 8 86
 ss; Cathodic protection of 70/30 — in 2.0 M nitric acid in the presence of organic corrosion inhibitors. Desai *et al.* ... 10 39
 —; Dezincification test for — based on potentiostatic polarisation. Maahn & Blum ... 9 39
 —; Formation of photosensitive films on —. Franco & Patel ... 8 235
 ss, α -; Changes in electrical resistance of — during stress corrosion cracking. Lahiri & Nayak ... 6 84
 —; Effect of stress and impressed current on tarnish film growth on — in ammoniacal copper sulphate solution. Sircar *et al.* ... 7 273
 —; Stress corrosion cracking of — in aliphatic amine solutions. Sircar *et al.* ... 9 47
 —; Stress corrosion cracking of — in ammonium sulphate solutions. Bhakta & Lahiri ... 8 182
 ed stainless steel; Interfacial corrosion of — joints in domestic tap water. Jarman *et al.* ... 8 33
 ges, Steel highway; Corrosion protection of —. I. Full scale trials of paint systems. Bishop ... 9 149
 II. Characterisation of bridge locations by corrosion and environmental measurements. Hutchins & McKenzie ... 9 158
 III. Protective primers for the underside of steel bridges. McKelvie 9 163
 nine vapour; Kinetic study of thin film growth on silver in — at low temperatures (35°–70°C). Bose & Sircar ... 8 177

C

acitance measurements; Prediction of pitting corrosion in tinplate from —. Board *et al.* ... 7 87

Carbon fibre; Behaviour of couples of aluminium and plastics reinforced with — in aqueous salt solutions. Brown & Coomber ... 7 232
 Cathodic protection; — and stress corrosion cracking of mild steel district heating distribution schemes. Poulson *et al.* ... 9 91
 —; — of 70/30 brass in 2.0 M nitric acid in the presence of organic corrosion inhibitors. Desai *et al.* ... 10 39
 —; Ohmic potential drop in — of buried structures: Evaluation of some measuring methods. Wallen & Linder ... 8 7
 Central heating; Corrosion in hot water —. von Fraunhofer ... 6 23
 Central heating systems; Prevention of corrosion in domestic hot water —. Cotton & Jacobs ... 6 42
 —; Some aspects of water treatment for —. Drane ... 6 39
 —; Some important aspects of corrosion in —. Butler *et al.* ... 6 31
 —; Typical cases of corrosion in — in council properties—summary. Burns *et al.* ... 6 45
 Chloride film; Kinetics and mechanism of thin — growth on silver and silver-cadmium alloys at low temperatures (35°–70°C). Bose & Sircar ... 8 279
 Chloride ions; Anodic passivation of iron and steel in solutions containing non-oxidising inorganic inhibitors and breakdown of passivity by —. Rajagopalan & Venu ... 6 216
 Circulating systems; Problems in sea water —. Shone ... 9 32
 Citrate solutions; Rate of dissolution of tin from tinplate in oxygen-free —. I. Assessment by polarisation measurements. Sherlock *et al.* 7 222
 II. Effect of coating porosity. Sherlock *et al.* ... 7 227
 Cl—agglomeration; Electron microprobe study of — at sulphide inclusions in iron and stainless steel. Szummer & Janik-Czachor ... 9 216
 Coatings, Anodic; Protection of aluminium alloys against stress corrosion cracking in saline water by properly oriented —. I. Influence of anodising conditions. Skoulidakis & Karageorgos ... 10 17
 Coatings, Metal; — on steel at Lighthouse Beach, Lagos. Stanners ... 6 211
 —; Protective —: A review. Clarke ... 6 197
 Coatings, Metallic; Novel method for determining the strength and resistance to damage of — used for corrosion protection. Chappell & Kenny ... 9 244
 Coatings, Organic protective; Contribution to the study of localised corrosion of aluminium and its alloys. III. Influence of —. Bonora *et al.* ... 10 23
 —; Recommendations for controlling the application of —. van Aalst *et al.* ... 9 147
 Coatings, Zinc; Painting of flame sprayed —. Wallington ... 9 72
 Cobalt-base alloys; Some aspects of the hot corrosion of —. Richards & Stringer ... 8 167

Complex; — formation and corrosion rate for tin in fruit acids. Sherlock & Britton ... 7 180
 Complexing; Effect of tin ion — substances on the relative potentials of tin, steel and tin-iron alloy in pure acid and food media. Willey ... 7 29
 Concrete; Corrosion of prestressed steel wire in —. Treadaway ... 6 66
 Condenser tubes; Corrosion of — due to carbonaceous film on the surface. Retief ... 8 264
 Copper; Behaviour of — in artificial sea water containing sulphides. Mor & Beccaria ... 10 33
 —; Composition of oxide formed on — and copper-manganese alloys (5–40% Mn) in oxygen at 150°–600°C. Panda *et al.* ... 9 51
 —; Developments leading to the present understanding of the mechanism of pitting corrosion of —. Lucey ... 7 36
 —; Enhancing the corrosion resistance of — and its alloys. Marsden ... 7 251
 —; Erosion corrosion in — water tubing. Knutsson *et al.* ... 7 208
 —; Formation and breakdown of surface films on — in sodium hydrogen carbonate and sodium chloride solutions. I. Effects of anion concentrations. Thomas & Tiller ... 7 256
 II. Effects of temperature and pH. Thomas & Tiller ... 7 263
 —; Inhibition by some thiocompounds of the corrosion of — in monochloroacetic acid solution. Patel & Franco ... 10 205
 Copper alloys; Influence of pollution on the corrosion of — in flowing salt water. Giuliani & Bombara ... 8 20
 Copper tubes; Pitting corrosion in — in cold water service. Cornwell *et al.* ... 8 202
 Corniform corrosion; — of mild steel exposed to acid and humid environments. Hill ... 8 128
 Corrosion; — and corrosion prevention in airframes. Scott ... 6 145
 —; — problems of the 14 ships anchored in Great Bitter Lake. Juchiewicz & Banas ... 6 234
 'Corrosion and corrosion protection'; Research and development programme on — in the German Federal Republic. Behrens ... 10 122
 Corrosion, Bimetallic; — effects on mild steel in natural environments. Johnson & Abbott ... 9 171
 Corrosion fatigue; Low frequency — of a carbon steel with stress concentrations. Whitaker & Booker 8 246
 Corrosion, Interfacial; — of brazed stainless steel joints in domestic tap water. I. Jarman *et al.* ... 8 33
 II. Metallographic aspects. Jarman *et al.* ... 10 150
 Corrosion, Intergranular; Mechanism of — of austenitic stainless steels — Literature review. Wilson ... 6 100
 Corrosion, Layer; Mechanism of exfoliation (—) of Al–5% Zn–1% Mg. Mattsson *et al.* ... 6 73

- Corrosion, Localised; Contribution to the study of — of aluminium and its alloys. I. Critical potential, E_R , with respect to pitting. Bonora *et al.* ... 9 108
- II. Influence of the environment. Bonora *et al.* ... 9 112
- III. Influence of organic protective coatings. Bonora *et al.* ... 10 23

- Stress concentrations; Low frequency corrosion fatigue of a carbon steel with —. Whitaker & Booker ... 8 246
- Stress corrosion; Aqueous — in titanium alloys. Wanhill ... 10 69
- ; Comparison of the fracture toughness and — behaviour of four aluminium alloys. Carter *et al.* ... 9 16
- ; Index of susceptibility to — for austenitic steels based on the electromechanical model. Tyzack ... 7 268
- ; Influence of nitrogen content on the — susceptibility of some austenitic chromium-nickel steels. Maskell & West ... 6 10
- ; Influence of trace additions of silver on the — of an Al-4% Zn-3% Mg alloy. Doig & Edington ... 9 22
- ; — spectrum. Parkins ... 7 15
- ; — susceptibility of as-quenched Al-5.9 wt-% Zn-3.2 wt-% Mg alloy. Doig & Edington ... 9 220
- ; — test methods. Parkins *et al.* ... 7 154
- ; Use of microelectrodes in the study of — in aged Al-7.2 wt-% Mg and Al-4.4 wt-% Cu alloys. Doig & Edington ... 9 88
- Stress corrosion crack propagation; Intergranular — in magnesium-aluminium alloys. Fairman & Bray ... 6 170
- Stress corrosion cracking; Cathodic protection and — of mild steel district heating distribution schemes. Poulson *et al.* ... 9 91
- ; Changes in electrical resistance of α -brass during —. Lahiri & Nayak ... 6 84
- ; Effects of quenching and tempering upon the — of ferritic steels. Parkins *et al.* ... 8 117
- ; Fracture mechanics and —. Tyzack ... 6 219
- ; Fracture mechanics and —. Discussion on. West *et al.* ... 7 189
- ; Protection of aluminium alloys against — in saline water by properly oriented anodic coatings. I. Influence of anodising conditions. Skoulidakis & Karageorgos ... 10 17

- ; Role of temperature in — of iron in nitrate solutions. Flis ... 10 79
- ; — in austenitic stainless steel fixings for façade panels. Balk *et al.* ... 9 4
- ; — of α -brass in aliphatic amine solutions. Sircar *et al.* ... 9 47
- ; — of α -brass in ammonium sulphate solution. Bhakta & Lahiri ... 8 182
- ; — of cast iron-nickel-chromium alloys. Hart ... 6 164
- ; — of mild steel in a phosphate solution. Middleton ... 8 62
- Stress corrosion cracks; Initiation of — in a low alloy steel. Parker ... 8 124
- Structure, Chemical; Tafel slopes and — of inhibitors of the acid corrosion of steel. Driver & Meakins ... 9 233
- Structures, Steel; Corrosion of —. Scimar ... 8 154
- Sucrose; Corrosion and anodic polarisation behaviour of aluminium in sodium hydroxide solution containing — or allied products, with and without calcium. Subramanyan & Krishnan ... 7 184
- Sulphate-reducing bacteria; Corrosion of mild steel in cultures of —; Effect of changing the soluble iron concentration during growth. King *et al.* ... 8 89
- Sulphate solutions; Anodic behaviour of iron in sodium — containing fatty acids. Mrowczynski & Szklarska-Smialowska ... 10 192
- ; Ellipsometric study of film formation on iron in sodium — in the pH range 6-12. Szklarska-Smialowska & Mrowczynski ... 10 187
- Sulphides; Behaviour of copper in artificial sea water containing —. Mor & Beccaria ... 10 33
- ; Behaviour of zinc in sea water in the presence of —. Mor *et al.* ... 9 53
- ; Nature of — and their corrosive effect on ferrous metals: A review. Smith & Miller ... 10 136
- Sulphides, Iron; Corrosion of mild steel by —. King *et al.* ... 8 137
- Sulphur; Effect of — and manganese on nucleation of corrosion pits in iron. Janik-Czachor *et al.* ... 7 90
- Sulphur dioxide; Kinetic study of the uptake of — by aluminium. Spedding ... 7 281
- Surface treatment; Influence of — on the pitting potential of mild steel and pure (carbonyl) iron. Defrancq ... 9 29

T

- Tafel slopes; — and chemical structure of inhibitors of the acid corrosion of steel. Driver & Meakins ... 9 233
- Tarnish film; Effect of stress and impressed current on — growth on α -brass in ammoniacal copper sulphate solutions. Sircar *et al.* ... 7 273
- Tarnish films; Coulometric reduction of sulphide — on tin. Wolyneć & Gabe ... 6 271

- Tarnishing, Sulphide; — of tin in alkaline polysulphide solutions. I. Kinetics of film formation and simultaneous dissolution. Wolyneć & Gabe ... 7
- ; II. Mechanism of tarnishing. Wolyneć & Gabe ... 7
- Temperature; Influence of movement and — on the corrosion of mild steel. IV. Inhibition by sodium metaphosphate glass. Butler & Stroud ... 6
- ; Role of — in stress corrosion cracking of iron in nitrate solutions. Flis ... 10
- Test methods; Stress corrosion —. Parkins *et al.* ... 7
- Tests; Atmospheric corrosion sites in Europe available for — on steel protection. Barton & Stanners ... 8
- Tests, Dezincification; Comparative study of —. Nielsen & Rislund ... 8
- Thermobalance; Inexpensive silica spring — for oxidation studies. Sharp ... 6
- Thermometric (Mylus) technique; Determination of corrosion and inhibition of mild steel in HNO_3 by the —. Sanyal & Srivastava ... 8
- Thiocompounds; Inhibition by some — of the corrosion of copper in monochloroacetic acid. Patel & Franco ... 10
- Tin; Complex formation and corrosion rate for — in fruit acids. Sherlock & Britton ... 7
- ; Coulometric reduction of sulphide tarnish film on —. Wolyneć & Gabe ... 6
- ; Effect of tin ion complexing substances on the relative potentials of —, steel and tin-iron alloy in pure acid and food media. Willey ... 7
- ; Examination of oxides on — surfaces by cathodic reduction. Britton & Sherlock ... 9
- ; Promotion by nitrates of the dissolution of — by acids and its inhibition. Sherlock & Britton ... 8
- ; Sulphide tarnishing of — in alkaline polysulphide solutions. I. Kinetics of film formation and simultaneous dissolution. Wolyneć & Gabe ... 7
- ; II. Mechanism of tarnishing. Wolyneć & Gabe ... 7
- Tin free steels; Comparative corrosion resistance of — chromium-type to synthetic and natural food media. Azzzerri & Baudo ... 10
- Tinplate; Examination of the layer produced by chromate passivation treatments of —. Britton ... 10
- ; Prediction of pitting corrosion of — from capacitance measurements. Board *et al.* ... 7
- ; Properties and production of Grade K — and its performance in canning trials. Endlé ... 7
- ; Rate of dissolution of tin from — in oxygen-free citrate solutions. I. Assessment by polarisation measurements. Sherlock *et al.* ... 7
- ; II. Effect of coating porosity. Sherlock *et al.* ... 7

plate, Lacquered; Polarisation measurements as a guide to the performance of ——. Kleniewski ... **10** 91
 nium; Formation of river markings during sub-critical cracking of —— and its alloys. Wanhill ... **8** 252
 —; Pitting corrosion of ——. Cotton ... **7** 59
 nium alloy; K_{Ic} and K_{Isc} for a very high strength — (IMI 551). Wanhill & de Rijk ... **9** 84
 —; K_{Ic} , K_{Isc} and environmental fatigue crack propagation resistance of a high strength ——. Wanhill ... **8** 216
 nium alloys; Aqueous stress corrosion in ——. Wanhill ... **10** 69
 nium (Ti 125 and Ti 260); Corrosion of construction materials —, 304L and Uranus 65, in contact with Pt catalysts in nitric acid production. Kostić *et al.* ... **9** 211

V

es; Corrosion investigation of — in flowing sea water. Mattsson & Svensson ... **7** 200

Vapour phase corrosion inhibitors; Fungicidal properties of some ——. Sanyal & Sen Gupta ... **9** 57

W

Water, Domestic tap; Interfacial corrosion of brazed stainless steel joints in ——. I. Jarman *et al.* ... **8** 33
 II. Metallographic aspects. Jarman *et al.* ... **10** 150
 Water treatment; Some aspects of — for central heating systems. Drane ... **6** 39
 Weather; Prediction of the suitability of the — conditions for external painting; A painting — map. McKelvie ... **10** 107
 Weathering; Effect of — on the electrochemical behaviour of steels. Bruno *et al.* ... **7** 122
 Weld metal; Corrosion of stainless steels in the immediate vicinity of the ——. Číhal & Ježek ... **7** 76

—; Potentiostatic study of the corrosion behaviour of austenitic stainless steel ——. Gooch *et al.* **6** 148
 Wood; Corrosive effect of plastics, rubber and — on metals in confined spaces. Knotková-Čermáková & Vlčková ... **6** 17

Z

Zinc; Behaviour of — in sea water in the presence of sulphides. Mor *et al.* ... **9** 53
 —; Corrosion of — and steel in dilute aqueous solutions. Hubbard & Shanahan ... **8** 270
 —; Inhibitory action of acrylonitrile on the corrosion of — in sea water. Mor & Beccaria ... **8** 25
 —; Painting of flame sprayed — coatings. Wallington ... **9** 72
 Zinc and aluminium coatings; Arc and flame sprayed — on mild steel: Bond strength, surface roughness, structure and hardness. Bardal *et al.* ... **8** 15
